Backend Settings

How to configure General Settings of plugin?

This is the main settings area. Configure all options as per your requirements. Like thumb size, button title, colors, style, size, file types to allow etc.

There are other tabs for advance settings, meta forms and others.

The screenshot shows the backend settings interface for the File Manager Plugin. The interface includes a sidebar menu on the left with options like Dashboard, Posts, Media, Pages, Comments, User Files, WooSocio, Appearance, Plugins, FileManager (highlighted), User Files, Users, Tools, Settings, and WP Editor. The main content area has several tabs: Basic Setting (selected), Advance settings, Frontend Settings, Messages, User Files, File Meta, and How to use?. Below the tabs, there is a section titled "Set options as per your need" with the following settings:

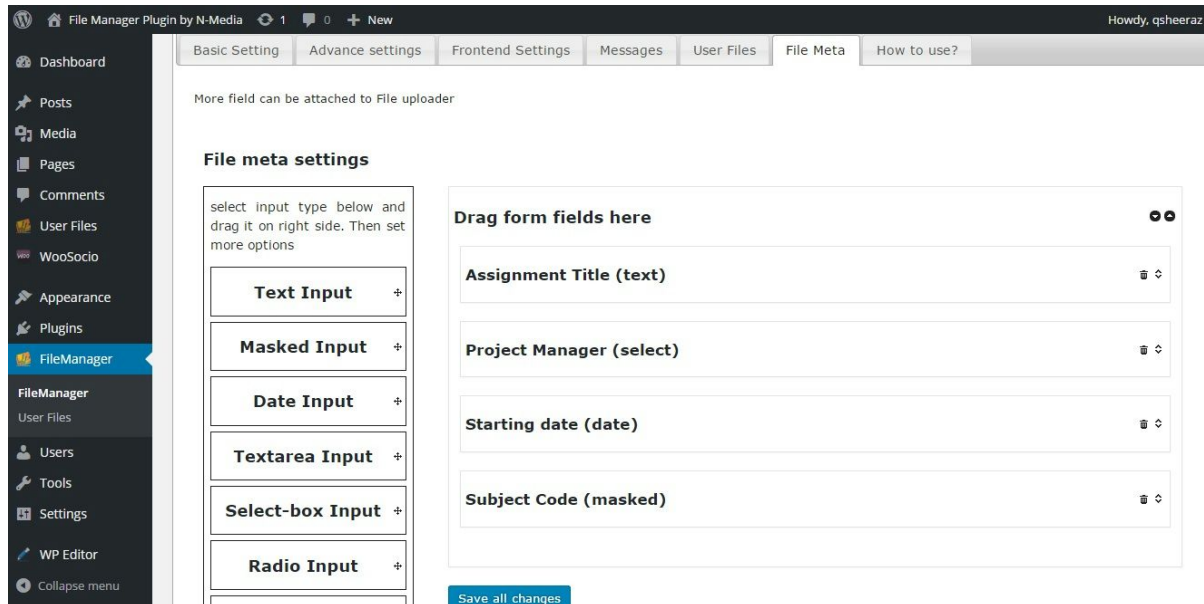

Setting Name	Value	Example / Note
Images thumb size	100	type size in px like: 100
Uploader button title	Upload Files	
Uploader button background color	Select Color	in Hex code like: #ffcc
Uploader button text color	Select Color	in Hex code like: #ffcc
Uploader area background color	Select Color	in Hex code like: #ffcc
Maximum file size in mb	50mb	e.g: 3mb
Max numbers of files (Max 5 allowed in free version)	6	e.g: 3
File types	jpg,png,gif,docs,doc,pdf,zip,rar	e.g: jpg,png,gif,zip,pdf

At the bottom right of the settings area, there is a "Save settings" button. The browser address bar shows the URL: filemanager.dev/wp-admin/admin.php?page=nm_filemanager#general-settings.

How to Create Meta Form

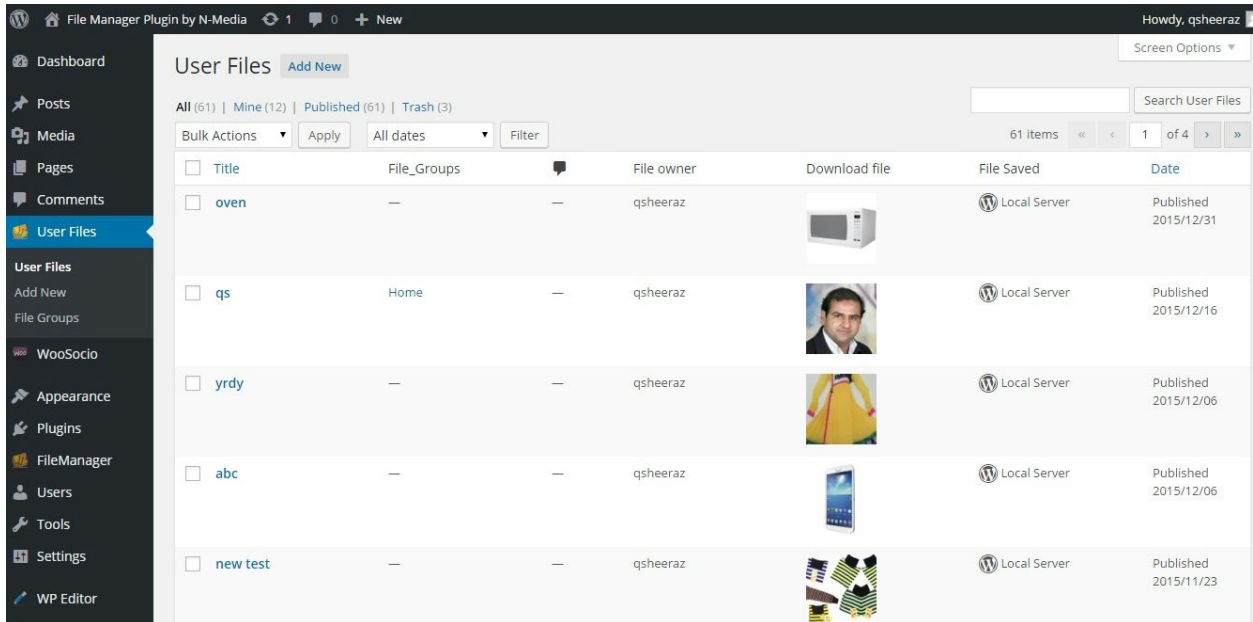

Drag and drop fields to create required meta form. This form will appear after uploading file. This data can be edit/update even after anytime. You can use edit icon from FileTools column to edit/update meta information of the file.

All popular controls are available to create a beautiful form according to user requirements.

How to view all files in admin:

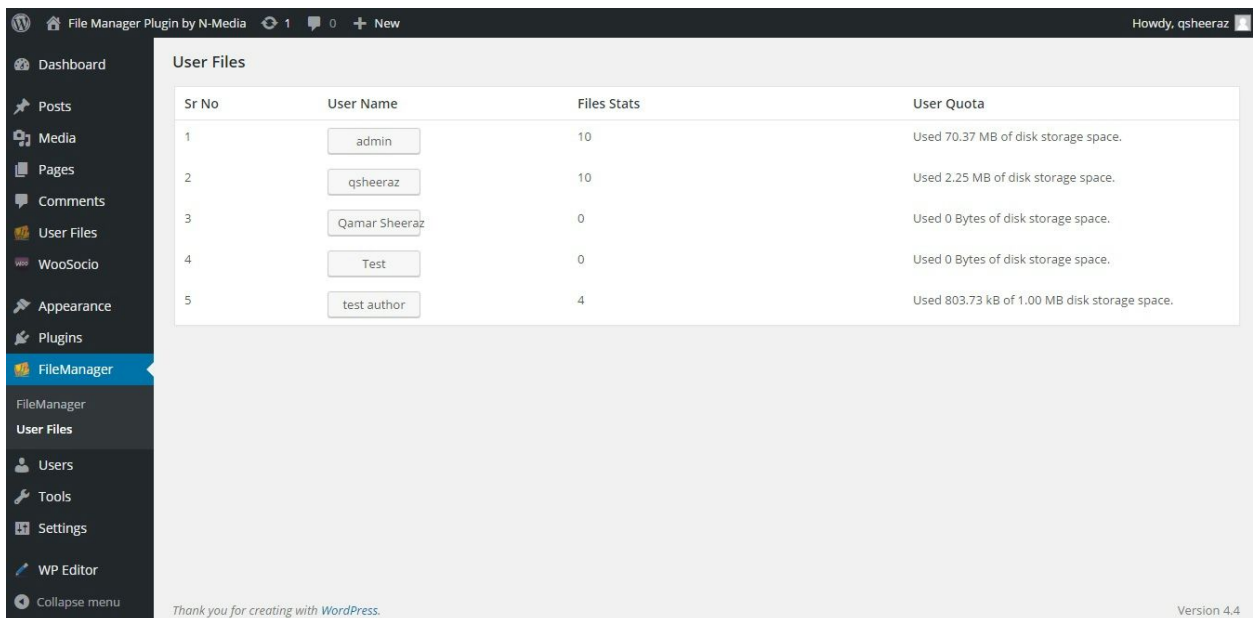

This is the admin view area to view all files uploaded.

Title	File_Groups	File owner	Download file	File Saved	Date
<input type="checkbox"/> oven	—	qsheeraz		Local Server	Published 2015/12/31
<input type="checkbox"/> qs	Home	qsheeraz		Local Server	Published 2015/12/16
<input type="checkbox"/> yrdy	—	qsheeraz		Local Server	Published 2015/12/06
<input type="checkbox"/> abc	—	qsheeraz		Local Server	Published 2015/12/06
<input type="checkbox"/> new test	—	qsheeraz		Local Server	Published 2015/11/23

How to view user specific files in admin:

Here you can view files of a specific user.

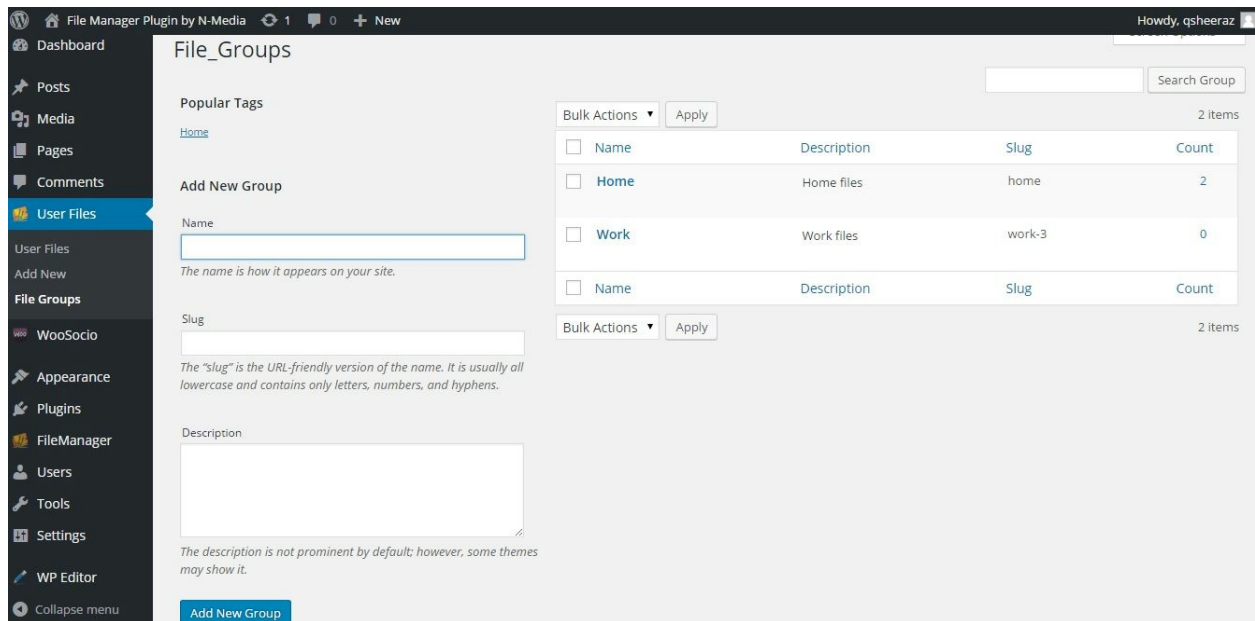

Sr No	User Name	Files Stats	User Quota
1	admin	10	Used 70.37 MB of disk storage space.
2	qsheeraz	10	Used 2.25 MB of disk storage space.
3	Qamar Sheeraz	0	Used 0 Bytes of disk storage space.
4	Test	0	Used 0 Bytes of disk storage space.
5	test author	4	Used 803.73 kB of 1.00 MB disk storage space.

Thank you for creating with WordPress. Version 4.4

How to create file groups:

These files groups is used in Shortcode to share file within. Following shortcode with render an Upload Form and Files within Group ID. So different pages can be create with different groups:

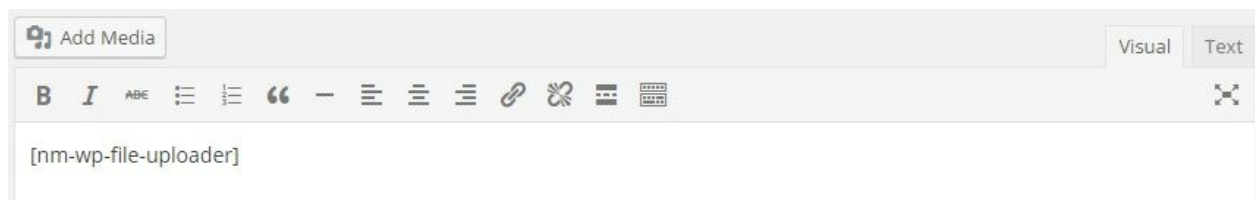

```
[nm-wp-file-uploader group_id="25,35"]
```

How to render Upload Form on Frontend?

Just use following shortcode in a page:

```
[nm-wp-file-uploader]
```

How allow users to only Download Files from a Group?

Now in version 8.3 Admin can create a Download pages where users (logged in) can download files only. For example if Admin want to create download area where:

- 1- only files belongs Students Group (ID:23) should display
- 2- only users having role: subscriber can access this download page

Then use following shortcode:

```
[nm-wp-file-downloader group_id="23" role="subscriber"]
```

How to make Download Page for Public Users

Now public download can be set using following shortcode. All files uploaded within Group can be downloaded by public users:

```
[nm-wp-file-downloader group_id="23" role="public"]
```

How to Upload Files through FTP?

Put files in the folder `wp-content/uploads/user_uploads/user/ftp` through ftp. After putting files in user's folders, go to ftp upload tab from options panel and click on the button 'post FTP files'

You can also indicate user about ftp uploaded files in users listing by setting options available in option panel.

FileManager

Basic Setting Advance settings Frontend Settings Messages User Files File Meta **FTP upload** How to use?

Post files to users accounts uploaded through FTP

Notify user in files list about ftp uploaded file? Yes Please check if you want to notify user in files list about ftp uploaded files..

Frontend Settings

How to use file tools:

After rendering shortcode for uploader, users can see this uploader area and their uploaded files. User can switch between tree style or normal style.

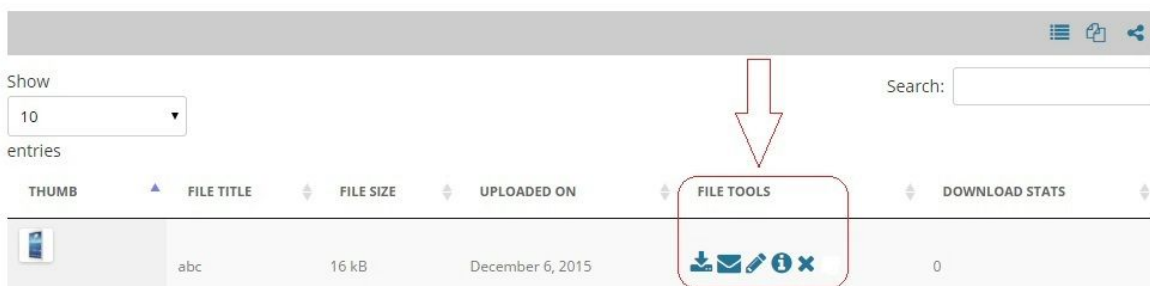

Also can view shared files by clicking on shared files icon.

Use file tools to delete, share by mail, download, view and edit file meta.

User can search files by typing in search field.

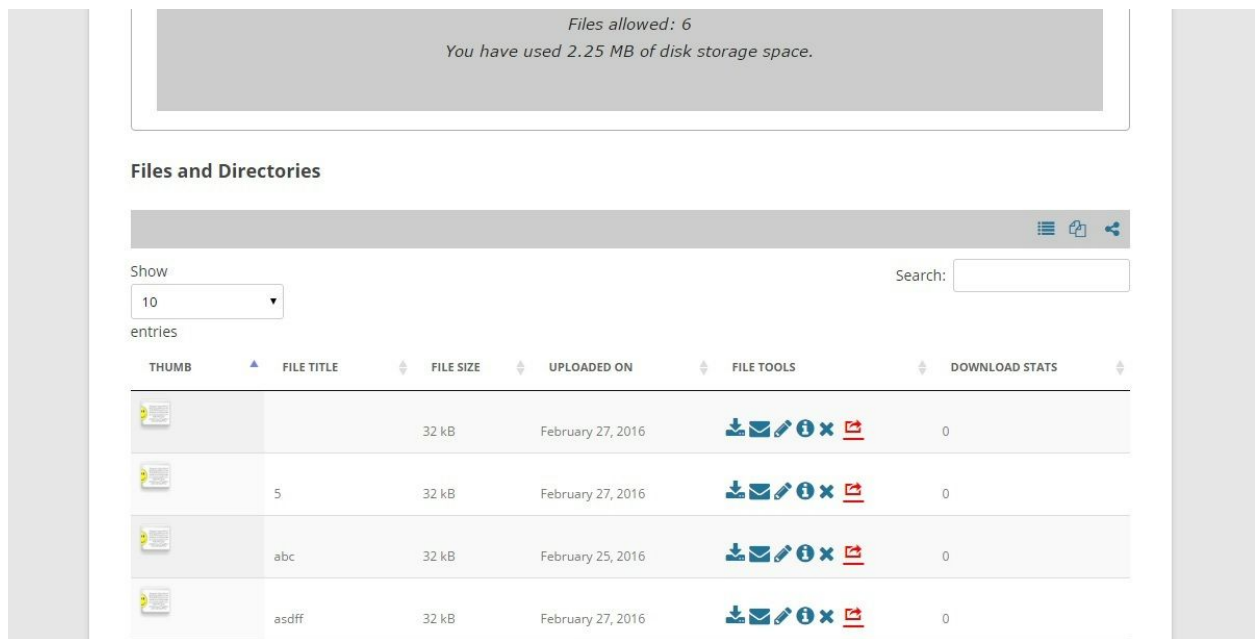

Files and Directories

User specific add on

How to use FileManager Add on to share files

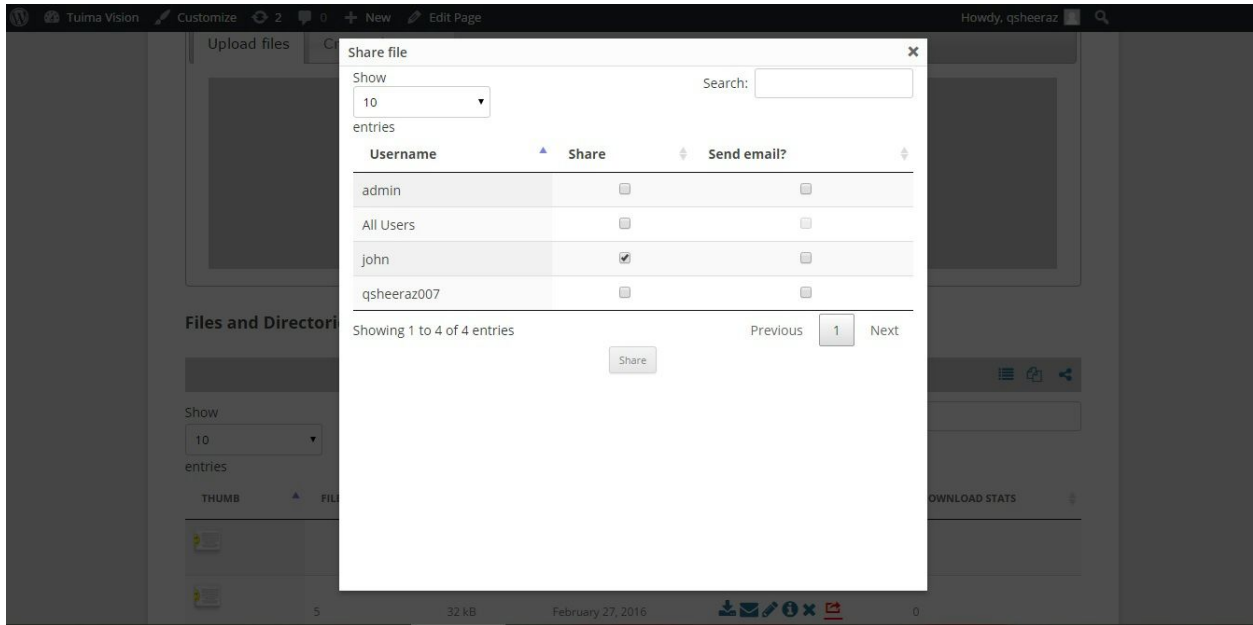

You can share files with users after getting user specific add on. To share files, click on red share icon.

The screenshot displays a file manager interface. At the top, a grey box contains the text: "Files allowed: 6" and "You have used 2.25 MB of disk storage space." Below this, the section is titled "Files and Directories". There are icons for list view, folder view, and share. A "Show" dropdown menu is set to "10" entries, and a search bar is present. The main area is a table with columns: THUMB, FILE TITLE, FILE SIZE, UPLOADED ON, FILE TOOLS, and DOWNLOAD STATS. The table contains four rows of files, each with a thumbnail icon, a file name, a size of 32 kB, an upload date, a set of action icons (download, email, edit, info, delete, share), and a download count of 0. The share icon (a red square with a white share symbol) is highlighted in the first row.

THUMB	FILE TITLE	FILE SIZE	UPLOADED ON	FILE TOOLS	DOWNLOAD STATS
		32 kB	February 27, 2016	     	0
	5	32 kB	February 27, 2016	     	0
	abc	32 kB	February 25, 2016	     	0
	asdff	32 kB	February 27, 2016	     	0

select users and click share button.

You can also share files from admin panel, any user's file with any other user. From admin panel, click on user files menu and select user to see his/her files.
